PROFILE

I enjoy the challenges being a software developer brings: solving problems, learning new things, and always being able to improve the code. I finally feel that I am pursuing something I love - solving puzzles and continuing to learn.

SKILLS

TECH: HTML | CSS | JavaScript | React.JS | Bootstrap | C# | .NET | ASP.NET | Sql Server | Visual Studio

TECHNICAL EXPERIENCE

[Alpha /Echo Agency, Nashville, TN](#) - *Front End Web Developer(contract)* | July 2020 - August 2020

- Worked with 5 different clients building a multitude of web sites for front end design using **HTML, PHP, Wordpress, and CSS**.

[Nashville Software School, Nashville, TN](#) - *Junior Full Stack Developer* | August 2019 - February 2020

Six month full-time immersive full-stack development bootcamp focusing on projects in a technical environment that includes: JavaScript, React, HTML5, CSS3, Git, Github, npm, C#, ASP.net, and SQL Server.
• “Nutshell” team collaboration project to create a social media platform using vanilla JavaScript, ERDs, wireframes, and webpack. The project also employed basic user based CRUD functionality as well as the ability to login and register new users, send messages, and create new events.

Personal Project: Front End Capstone: “Sharing is Caring” <https://github.com/hspradlin8/Sharing-Is-Caring->

- Single page application that allows users to share and swap clothes. Users can search friends’ closets, identify items they like, send a notification to the friend about that specific item. The owner of that item receives the notification including the item and the friend user information. The app was created using an ERD, wireframes, React, HTML5, CSS, JSON server, ReactBootstrap, and Cloudinary.

Personal project: Back End Capstone: “Plant Life” <https://github.com/hspradlin8/PlantLife>

- Single page application that allows the user to keep track of their plants, potential issues with their plant, and watering schedule. Users have the option to add plants from the plant list to their personal list and/or add new plants. Once the plants are added to the users list, the calendar will populate the water frequency for each plant. **Tech stack:** ERD, mock-ups, MVC, .NET, C#, Bootstrap, and BootSwatch.

PROFESSIONAL EXPERIENCE

[TrustPoint Hospital, Murfreesboro, TN](#)

SYSTEMS: State Portal | Palmetto GBA | Ability | Availity | PassPort One Source | NexGen | HMS

Claims Coordinator | Nov 2018 - Aug 2019

- Helped track the gain and loss of claims revenues
- Researched all claims: adjusted the claims off accounts if claims were too old to be reprocessed, found out what information the insurance company was missing, and submitting the paperwork in order to have the claims reprocessed
- Analyzed trends of denial codes for the different insurance companies in order to prevent the problem with future claims.

Insurance Coordinator | July 2017 - Nov 2018

- Verified insurance for all potential patients and admitted patients
- Used various insurance portals to check patient insurance benefits, called the insurance companies(State Portal, Palmetto GBA, Ability, PassPort One Source, etc)
- Created basic insurance training manuals for all receptionist, had one-on-one sessions with new receptionists, and answered all insurance questions when needed

Receptionist | May 2016 - July 2017

- Greeted new patients, provided paperwork, and obtained a social worker to speak with them to answer all their questions before going to the unit
- Took phone referrals from patients, family members of future patients, and social workers
- All referrals information was put on Salesforce portal where patient demographic, insurance, and symptoms were listed.

Server & Hostess: Maple Street Grill (Waitress | Aug 2014 - May 2016)

/ Marina's on the Square (Waitress & Hostess | July 2011 - June 2014)

- Trained new servers and hostess on how to effectively work with the other staff members and to efficiently communicate with both front of house and back of house staff
- Kept a positive attitude and high energy while communicating with both the front and back of the house staff
- Maintained customer satisfaction by prioritizing the tasks at hand, being efficient, and having a positive demeanor

VOLUNTEER EXPERIENCE

Nashville Software School, Nashville, TN- Teacher Assistant (Jumpstart) | March 2020 & May 2020

- Assisted students in building simple applications using HTML, CSS, and JavaScript in two jumpstarts
